## **S**<sup>\*</sup>ORMSHIELD

### **Experts in exterior colours**

The impact of colour on the way we act and feel cannot be underestimated and at Johnstone's we understand the huge influence it holds. As a company with a long pedigree in coatings, we truly understand both the technical performance and psychological impact of colour. We offer over 16,000 colours in our Johnstone's range of coatings and have hand picked from these a range of over 200 render shades that not only offer a wide range of choice to our customers, but that are also available guickly from our industrial tinting facilities.

#### Colour that lasts

All of the colours featured in this colour guide have been chosen for their suitability for use on building facades as they offer excellent weathering and fade resistance. This is achieved through the use of high performance colour additives that have been extensively tested all over Europe for weather and UV resistance – in some of the sunniest climates of the Mediterranean and in the harshest of Alpine winters.

#### Bespoke colours

-

Speak to our colour experts for other shades that are not part of the standard render offer. We can produce unusual or special colours from across the colour spectrum to client request. Please note that additional lead times may be required for special colours.

For more information contact your Technical Sales Manager or call us on **01924 354354.** 

#### Superb colour advisory

Whether you require bespoke colour schemes, colour samples or general colour advice, Johnstone's can provide the ideas and answers you need. Choosing from thousands of colours may prove daunting, so we have experienced colour consultants available to assist you throughout the colour selection process.

#### Colour sampling service

Should you need to see the actual renders in the colour chosen before making your final decision we are able to provide a fast, reliable colour sample for you, or alternatively we can arrange for one of our team to apply a panel to a building or area you specify.

ohnstone's Stormshield External Wall Insulation and Render Systems have been carefully developed to of the highest levels of performance and lifespan when applied to our specification. Please use our Applicatic Guide for step by step assistance in the best way to apply render products.

#### **External Wall Insulation**

If you are choosing a render colour as a finish for an External Wall Insulation System you may want to review the Johnstone's Stormshield Complete System Guide fo External Wall Insulation. The guide contains additional information about our systems and products to help you make the right choices for your project.

#### Technical Support

The Johnstone's Stormshield team of technical experts is on hand to assist you in applying our products, providing written project specifications and in helping you with difficult or challenging details. We'll visit your site and can provide most technical services you may require to ensure any project is completed to the highest possible standards.

For more information or to get a copy of the guides please call or email and we'll be happy to help you to get the most from our products.

## **COMPLEMENTARY MASONRY PAINT PRODUCTS**

In the addition to the above finishing renders Johnstone's offer a full range of high performance masonry paints, including smooth masonry paint, textured paints and pliolite based exterior coatings for a variety of substrates including previously rendered surfaces, rough cast brick, block and concrete.

In addition we also offer Self Cleaning Masonry paint which has been specifically developed to help exteriors look cleaner for

longer and resist the dulling effects of pollution and weathering. Silicone Masonry paint is also available and had been designed to provide the highest level of breathability whilst repelling surface water to ensure long lasting protection for exterior surfaces. It is uniquely formulated for application over existing silicone render and paint systems.
